SUMMARY

Replace this file with your real, complete base resume in markdown. The applier pipeline will feed this verbatim to Claude alongside each JD and ask Claude to re-emphasise the most relevant experience without inventing anything new. The tighter and more factual this base resume is, the better the tailored output will be.

Keep section headers consistent (Summary, Experience, Projects, Skills, Education, Certifications) so the model can re-order cleanly.

EXPERIENCE

Senior Software Engineer — Example Co (2022 – Present)

- Bullet about a large outcome with a metric.
- Bullet about a system you built (technologies + scale).
- Bullet about leadership / cross-team work.

Software Engineer — Earlier Co (2019 – 2022)

- Bullet ...
 - Bullet ...
-
